
MOM MEETING (Date: 19/06/2026)

Discussion Points

1. Reviewed the complete Sales Order to Production workflow.
2. Confirmed workflow: **Sales Order → Production Plan → Work Order → Job Card Creation.**
3. Discussed material consumption and material release process before starting Job Cards.
4. Production department will raise a material request to Inventory.
5. Inventory department will verify stock availability.
6. If material is available, Inventory will release the material and production can proceed.
7. If material is not available, Procurement process will be followed:
RFQ → Purchase Order (PO) → GRN → QC Inspection → Stock Release → Material Issue to Production.
8. Discussed integration and responsibilities of Inventory, Procurement, QC, and Production departments.
9. Reviewed the complete workflow up to Production Completion and Dispatch.
10. No immediate changes were finalized during the meeting.

Client Decision

The client agreed with the discussed workflow and will review the process internally with their team. Any required changes or updates will be communicated after their internal discussion. System updates will be implemented according to the final approved process.

Next Process Flow

Work Order → Job Card Execution → Production Completion → Dispatch.
