MINUTES OF MEETING (MOM)

Sales Invoice & Accounts Module

---

1. Sales Invoice Page

1. **Customer PO-wise Drawing Fetching:** Fetch all drawings linked to the selected Customer PO in the Sales Invoice page.
2. **Manual Invoice Number:** Allow users to enter the invoice number manually.
3. **Company-wise Invoice:** Support invoice creation and management for two companies, with company-wise data separation.
4. **Invoice Status:** Add invoice status options such as Original (OG), Duplicate, and Multiple, as required.

2. Accounts Module

1. **Remove Fields:** Remove Received Amount, Outstanding Amount, Payment %, and Status from the Accounts page.
2. **Customer Invoice Details:** Display Customer PO Number and Invoice Number on the Customer Invoice page.
3. **Payment Entry Workflow:** Add a company dropdown on the Payment page; fetch invoices for the selected company; allow selection of a specific invoice and entry of received payment; automatically calculate received and outstanding amounts; and update invoice payment status.
4. **Payment History:** Display opening balance, current amount, received amount, and outstanding amount for payment tracking.
5. **Payment History Filters:** Add date-wise, customer-wise, and bank-wise filters.
6. **Bank Master:** Create a Bank Master to manage bank details.
7. **Payment Mode & Cheque Number:** Capture payment mode and cheque number where applicable. Populate the cheque number when available for cheque payments.

3. Decisions

Complete the Sales Invoice and Accounts workflow with company-wise invoice management, Customer PO-wise drawing selection, payment recording, automatic outstanding calculations, and detailed payment history.

Meeting Focus: Finalize the workflow and ensure invoice and payment records remain correctly linked to the selected company, customer, Customer PO, invoice, and bank/payment details.
