

Client Meeting – MOM (Accounts Workflow)

Project: SPTECH ERP – Accounts Module

Discussion Points

1. Customer Receivables

Workflow:

Sales Invoice → Customer Receivable → Receipt Entry → Payment Received → Payment History → Outstanding Updated

Points:

- Generate Sales Invoices
- Record Customer Receipts
- Support Partial & Full Payments
- Maintain Payment History
- Auto-update Outstanding Balance

2. Vendor Payables

Workflow:

Vendor Invoice → Vendor Payable → Payment Entry → Vendor Payment → Payment History → Outstanding Updated

Points:

- Record Vendor Invoices
- Record Vendor Payments
- Support Partial & Full Payments
- Maintain Payment History
- Auto-update Outstanding Balance

Decisions

- Separate modules for Customer Receivables and Vendor Payables.
- Outstanding balances should update automatically after each payment/receipt.
- Dashboard and reports should reflect real-time payment status.
- Payment History should be maintained for both Customers and Vendors.
